

POS Counter Quick Reference

Jewellery ERP - keep this at the till

1. Start of Day

- Open the app and log in.
- Dashboard > Daily Rates: enter today's Gold 24K / 22K / 18K / Silver, then Save & Update Rates.
- Rates drive EVERY bill price - never skip this.

2. Make a Sale (POS Billing)

- Columns: Customer (left) | Cart (center) | Payment (right).
- 1. Customer: search by phone/name; or type a name + Enter for a walk-in; or click + for a new customer.
- 2. Add items: scan the barcode (auto-adds).
 - Scanner dead / tag damaged? Type the barcode or HUID + Enter.
 - Item never tagged? Click Quick Bill > Weight-wise (gold needs HUID) or Flat price.
- 3. Old-gold trade-in: URD panel > Description / Tunch / Wt / Rate > Add (value is deducted).
- 4. Payment: split across Cash / UPI / Card / Cheque / NEFT / Udhari. Balance must reach Rs 0.
- 5. Checkout (F8) > print A4 (GST) / A5 / Thermal, or Send via WhatsApp.
- Estimate only (no stock reduced)? Build the cart, then Save as Quotation.

3. Must-Know Rules

- GOLD sells only if hallmarked - enter the 6-char HUID stamped on the piece.
- Cash >= Rs 2,00,000 OR any old-gold exchange -> red panel needs PAN + Aadhaar + ID upload.
- Lock the screen when you leave the counter (auto-locks after 15 min).
- App works offline; only live rates and WhatsApp need internet.

4. Quick Error Fixes

- 'No item found for ...' -> wrong/typo barcode; retype, or use Quick Bill.
- '... is sold ...' -> already billed at another counter; rescan inventory.
- '... has not been hallmarked (HUID is required)' -> gold needs its HUID; enter it, or bill as Flat price.
- Checkout greyed out -> Balance Remaining is not Rs 0; adjust a payment.
- 'Overpaid - reduce a payment' -> lower one of the payment amounts.

5. End of Day

- Day Book: match the cash drawer to today's transactions.
- Keep 'Backup on Exit' enabled, then close the app. Logout to end your shift.
